

The First Years Last Forever

How you can make a difference in the life of your child

How do I make a positive difference in the life of my child? What can I do to promote healthy brain development in my infant? How do I raise a happy, confident, successful learner? How can the first years last forever?

As a parent, you play an important role in shaping the way your baby will learn, think and behave in the future. Research shows that the relationship between you and your child in the early years is a necessary part of healthy brain development.

The First Years Last Forever is a first step to help you learn how to create a healthy parent-child relationship with your infant, which, in turn, will promote healthy brain development. This full colour booklet and accompanying video encourages and furthers this brain formation. Title #87
